

**SERVERS FOR WEB ENABLED SPEECH RECOGNITION**ABSTRACT OF THE DISCLOSURE

A markup language for execution on a client device in a  
5 client/server system includes instructions to unify at least one  
of recognition-related events, GUI events and telephony events on  
non-display, voice input based client device and a multimodal  
based client for a web server interacting with each of the client  
devices. A recognition server for receiving data indicative of  
10 inputted data provided to a client device and an indication of a  
grammar to use for recognition is also provided.
